

Package ‘pinp’

December 8, 2024

Type Package

Title 'pinp' is not 'PNAS'

Version 0.0.11

Date 2024-12-08

Description A 'PNAS'-like style for 'rmarkdown', derived from the 'Proceedings of the National Academy of Sciences of the United States of America' ('PNAS') 'LaTeX' style, and adapted for use with 'markdown' and 'pandoc'.

 pinp

PNAS-like two-column journal format.

Description

Format suitable for attractive two-column pdf vignettes

Usage

```
pinp(..., keep_tex = TRUE, citation_package = "natbib", collapse = FALSE)
```

Arguments

...	Additional arguments to <code>rmarkdown::pdf_document</code>
<code>keep_tex</code>	A boolean toggle to select whether intermediate LaTeX files are to be kept, defaults to TRUE
<code>citation_package</code>	A character variable selecting the LaTeX citation package; defaults to <code>natbib</code> .
<code>collapse</code>	A boolean toggle to enable the <code>knitr</code> option <code>collapse</code> , defaults to FALSE

Value

R Markdown output format to pass to [render](#)

Document options

Various aspects of pdf document can be customized by setting either standard **rmarkdown** options, or any of the following options (which are shown in alphabetical order) in the document metadata:

`abstract` (Optional but recommended) A free-format abstract summarizing the document.

`acknowledgements` (Optional) A free-format entry which will be placed at the end of the document.

`address` (Mandatory) YAML list with entries for code and address. The former matches the `affiliation` field of the author entry; the latter can be a free-format text giving, say, department and university along with an email address.

`author` (Mandatory) YAML list with entries for name and affiliation. The latter is matched to the code entry in `address` option.

`bibliography` (Optional) Name of a `.bib` file, suffix can be omitted; default is no bibliography.

`doi` (Optional but recommended) A free-format entry suitable for a doi or url referencing the document or its underlying code.

`fontsize` (Optional) Document fontsize, default is 9pt.

`footer_contents` (Optional) A free-format entry for text placed in the footer, useful to associate with a package or volume, default is 'Package Vignette'.

- `date_subtitle` (Optional) A free-form text string which be used to mention the bibliographic info in a post-print. If not specified, defaults to "This version was compiled on *current date*" where the current date is filled in.
- `document_date` (Optional) A free-form text string designed to specify the date of the document. It can be useful for example to specify the exact date of the publication in a post-print. If not specified it defaults to the current date.
- `headercolor` (Optional) Color code (in hexadecimal notation) for the title and section headers, default is blue tone matching the R logo: 185FAF.
- `keywords` (Optional) Keywords describing the document, supplied as a list.
- `lead_author_surnames` (Optional but recommended) A free-format entry for a short author description placed in the footer.
- `lineno` (Optional) Logical value to select line number display, may only work in one-column mode, default is false.
- `linkcolor` (Optional) Color code (in hexadecimal notation) for the urls and reference links, default is a light blue tone from the PNAS style: 000065.
- `numbersections` (Optional) Logical value to select numbered section headers, default is false.
- `one_column` (Optional) Logical value to select one-column mode, default is false.
- `one_sided` (Optional) Logical value to select one-sided format, default is false.
- `output` (Mandatory) Entry to tell rmarkdown to render via pinp; must be `pinp:pinp`.
- `secnumdepth` (Optional) Level of (LaTeX) section levels to number, default is 5.
- `skip_final_break` (Optional) Logical value to skip a final (force) page that is part of the PNAS style, default is false i.e. break is inserted as with PNAS.
- `title` (Mandatory) document title, no default.
- `watermark` (Optional) Logical value to select a 'Draft' watermark to be added (though figures tend to render above it, default is false).

The vignette source shows several of these options in use, and also describes some of the options.
